

## ACKNOWLEDGEMENTS

We have experienced massive kindness wherever we have travelled in the course of our research. The governments of the territories we visited were magnificently cooperative. Dr Claire Matthewson, Director, and the staff of University Extension, USP in Suva and in the islands, were fundamental in providing the basis of the research itself. Ruby Va'a, of the same department, not only contributed valuable material to the database but also facilitated our initial contact. The Pacific Islands Development Program of the East-West Center, the Center for Pacific Islands Studies, University of Hawai'i and Kagoshima University Research Center for the South Pacific provided us with most generous information. Without it the project would never have got off the ground.

Our debts to universities around the Pacific basin are equally profound. The University of California at Berkeley, the University of Queensland, Massey University, the Victoria University of Wellington, the University of Auckland, Brigham Young University at Laie and the University of Hawaii at Manoa must be mentioned, but there are others who may have been forgotten.

The total team consisted of:

John Charles, MA

Seiko Furuhashi, MEd

Tatsuhiko Kawashima, PhD

Toshio Kobayashi, MA

Yoko Ogashiwa, MA

Kazuyoshi Ogawa, BA

Michael R. Ogden, PhD

Yusaku Otsuka, MA

Satomi Sato, PhD

Kaoru Tokuyama, BA

Ruby Va'a, MPhil

Yoshikazu Wakabayashi, MA

Suk-Ying Wong, PhD

Matori Yamamoto, MA

Hayato Yamanaka, PhD

Aya Yoshida, MA

Fumihiko Yoshida, PhD

The project was funded by the Japanese Ministry of Education ("Mombusho") and the Japan International Cooperation Agency arranged for our reception at each island location and assisted us in many ways. The Japanese Ministry of Foreign Affairs smoothed our passage with great kindness, and the dedicated work of Keiko Ebina and Setsuko Nishiwaki at the keyboard has been

beyond praise.

All social science research projects are about people, and they depend on people for their data. Without the people who agreed to be interviewed we would have no product. The result is dedicated to them.

### **EDITORIAL NOTE**

The present text is in two parts: a series of research papers and essays, and samples of the "raw" data itself. John Charles, a Visiting Researcher at NIME, has attempted to coordinate and align the various styles and spellings of the original manuscripts, perhaps without conspicuous success. Since most raw copy was in "British" English, this has been adopted as the criterion for the main text.

Please also note that USP Extension Services was re-named University Extension in the course of the preparation of this report. This should account for any inconsistencies.
